

The Back-Up© Shotgun Rack System Delivers Home Protection From Bed

Newark, Delaware – Home Back-Up Protection, LLC has released a patented polymer shotgun racking system for easy access to shotguns used for residential protection.

The Back-Up, is a racking system for any legal size shotgun. This keeps the firearm fixed securely to the side of the owner's bed facilitating easy access for protection against home invasion. .

According to the U.S. Department of Justice and the Federal Bureau of Investigation almost 1.5 million reported burglaries were against private residences in 2005. It is no wonder then that 100 million U.S. households have shotguns for the sole purpose of home protection. Unfortunately most people have limited access to their shotguns in an emergency. Most people using a shotgun for home protection keep the gun in the corner of the bedroom or beneath the bed. Both locations require excessive response time, deny visibility and limit range of motion. Therefore, in an emergency, using these places sacrifices time and accuracy that could ultimately cost lives. The truth is no homeowners without The Back-Up, device have good access to their firearms.

With The Back-Up, shotgun racking system, homeowners are able to access their firearms in just a few seconds even while in bed. Fitting easily between the mattress and box springs, The Back-Up, cannot be felt while sleeping and can remain concealed by bedding day and night. Made with a special polymer The Back-Up, resists corrosion and is both more durable and 86 percent lighter than steel. In fact, Home Back-Up Protection, LLC has a U.S. Utility Patent on The Back-Up, shotgun racking system and is therefore the only source for this unique home protection device.

The Back-Up, retail price is \$39.95 plus shipping and handling which the Company President, John Peters considers a small price to pay for "Protection Within Reach." The Back-Up, can be purchased in over 250 countries [file:///via http://www.the-backup.com/](http://www.the-backup.com/)

Home Back-Up Protection, LLC is a Delaware Corporation that takes great pride in producing a product manufactured entirely in the U.S.A. The company says that for those people who choose firearms for home protection, the shotgun makes the most sense. The product has been featured on Fox National News with E.D. Hill, and has received international press in Germany, Sweden, and Australia.

For interviews contact Company President, John Peters at 612-605-3613.
